- 1. In January 1949 neither Rechlin nor Rechlin/Larz airfields were being used by the Soviet Air Force. The runways at Rechlin/Larz have, however, been repaired and are clear of craters. In September 1948 Soviet officers inspected the two airfields and a week later workmen went over the runways at Rechlin/Larz once again to carry out minor repairs. Nothing further happened and up to 16 January 1949 the local farmers were still allowed to graze their cattle over the airfields.
- 2. The seaplane base on the Muritz See at Rechlin was used by the Germans during the early thirties. The sheds have never been dismantled. These structures now serve as the main buildings of a new shippard which is constructing wooden fishing vessels. The necessary equipment being available, cutter construction began in September 1948. At present there are two finished hulls lying on the lake. Four hundred hands are employed, at least half of whom are still working on the completion of the seaplane hangars.
